2018 ELECTRIC

A person is walking away from the camera on a brick-paved path. They are carrying a black folding bicycle with their right hand. The person is wearing a dark jacket, light-colored pants, and white sneakers. A large green messenger bag is slung over their shoulder. The path is lined with a modern wooden structure that has a slatted, lattice-like design. In the background, a street with cars and trees is visible.

Welcome to Tern

We build bikes with an eye to changing the world—or at least the way that folks get around. Although our bikes ride like full-size bikes, they fold in 10-seconds to play nice with trains, cars, and small spaces.

On a company level, we're serious about cycling advocacy. Find us riding to work, supporting local cycling associations, or partnering with municipal transit authorities. We're doing our part to put bikes at the center of urban life.

We love bikes because they help us live sustainably, but we try to build them sustainably too. We design our bikes to be serviceable rather than land-fillable. We're constantly searching for ways to reduce our impact, like minimizing packaging, specifying recycled cardboard, and reducing use of harmful chemicals.

Twenty-four hours a day, in some part of the world, we're designing, testing, riding, and improving our products. If you're in Taiwan, U.S.A., England, Finland, China, Germany, or Switzerland, come say hi.

ELECTRIC BIKES

All around the world, the way we get from A to B is changing. With the world on the verge of driverless cars, ride-sharing, and the mainstream arrival of electric vehicles, it's an exciting moment for transportation. We realized we could help drive this force of change, so we spent the last four years developing two amazing machines that bring us closer to the utopian dream of sustainable, effortless, and unlimited movement. Our newest bike platform, the Bosch-driven GSD, takes hills, headwinds, traffic, and bike thieves out of commuting. Discover the freedom of Tern.

GSD S10

NEW

Enormously Useful. Surprisingly Small

- Same length as a regular ebike—fits anywhere a standard ebike can. Plus, the GSD gets even smaller, packing down to 1/2 its volume in only 10 seconds
- Designed to carry a family. With space for up to two Thule Yepp Maxi seats, bring two kids along for the ride, and pack a weekend of groceries up front
- Ready for sharing. With an adjustable cockpit, adjusts to fit mom, dad or the kids—any rider from 4' 10" to 6' 5"
- Cargo-bike capacity, with a city-bike footprint for serious grocery-runs, or even a second adult passenger
- Built superlatively-tough, with Magura 4 piston disc brakes, custom 65 mm Schwalbe Super Moto-X tires, Boost thru-axle hubs, and custom 36 mm wide rims
- Dual battery ready, for Bosch-powered range of up to 150 miles

- Tern Valo Direct light, with 150 lumens of power, for 24 hour visibility
- Full fenders, rear rack, chainguard, and front and rear electric lights
- Schwalbe Big Apple tires with Kevlar puncture protection

SHORTBED™ TRAY

For Every Cargo Contingency

The Shortbed Tray offers double the footprint of the Transporteur Rack, and even more modularity. Plus, loads sit even lower to the ground, for extra stability. Complete that Costco run by bike, bring plenty of beer and snacks for the whole party, or pack it with a cooler and save the day at soccer practice. Depending on your cargo preference, mount it parallel or perpendicular.

TRANSPORTEUR™ RACK

Front and Center

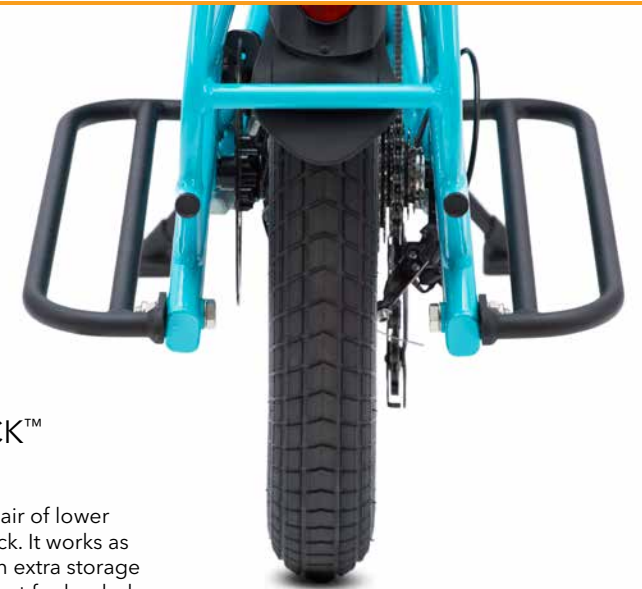

The Transporteur Rack is a modular cargo carrier. Accessorize it with an ice chest, a recycled wooden box, or carry a case of water. It carries up to 45 lbs, so even when you're carting two kids on the back you can bring a picnic too.

SIDEKICK LOWER DECK™

Low Rider

The Sidekick Lower Deck adds a pair of lower shelves to the GSD's integrated rack. It works as a convenient foot-rest for riders, an extra storage space for cargo or an added support for loaded Cargo Hold Panniers.

SIDEKICK SEAT PAD

... On A Bicycle Built For Two

The GSD lets you bring one adult passenger along for the ride. The Sidekick Seat Pad lets that passenger ride in comfort. With a KLiCKfix rack mount, the Sidekick Seat Pad clips on and off in seconds. Pair it with the rest of the Sidekick kit for extra comfort and convenience.

SPARTAN™ RACK

A low-riding front rack for 20" Tern bikes

Designed for loaded touring, the Spartan Rack is built from large-gauge tubular aluminum for strength and stiffness. Thanks to its low center of gravity, it delivers excellent stability when saddled with panniers without compromising folded size. Fits 20" Tern bicycles, except when equipped with Tarsus forks.

SIDEKICK HANDLE

Hold On Tight

The Sidekick Handle provides a strong and secure handle for an extra rider on the GSD. It's mounted on the integrated rack, for maximum stability. It features an ergonomically shaped handle, for added comfort. Perfect for a bicycle built for two.

SIDEKICK FOOT PEGS

Spring-Loaded Support

The Sidekick Foot Pegs are retractable foot supports for a rear passenger. They tuck into the frame when not in use, and pop out with one push when you need them.

CARGO HOLD PANNIERS

The Bike-Trunk

Think of the Cargo Hold Panniers as a trunk for your bike. Keep your lock, rain jacket, and tool kit inside so they're always ready. And then load them up with a week's worth of groceries or a tent and balance bike for a weekend trip to the park. Use the lid when it's raining or roll it up and out of the way when you've got extra large stuff to carry.
